

CommAgility

- A Focused Product Company
- Flexible for our Customers
- Very Experienced
- Successful
- Strategic

A Focused Product Company

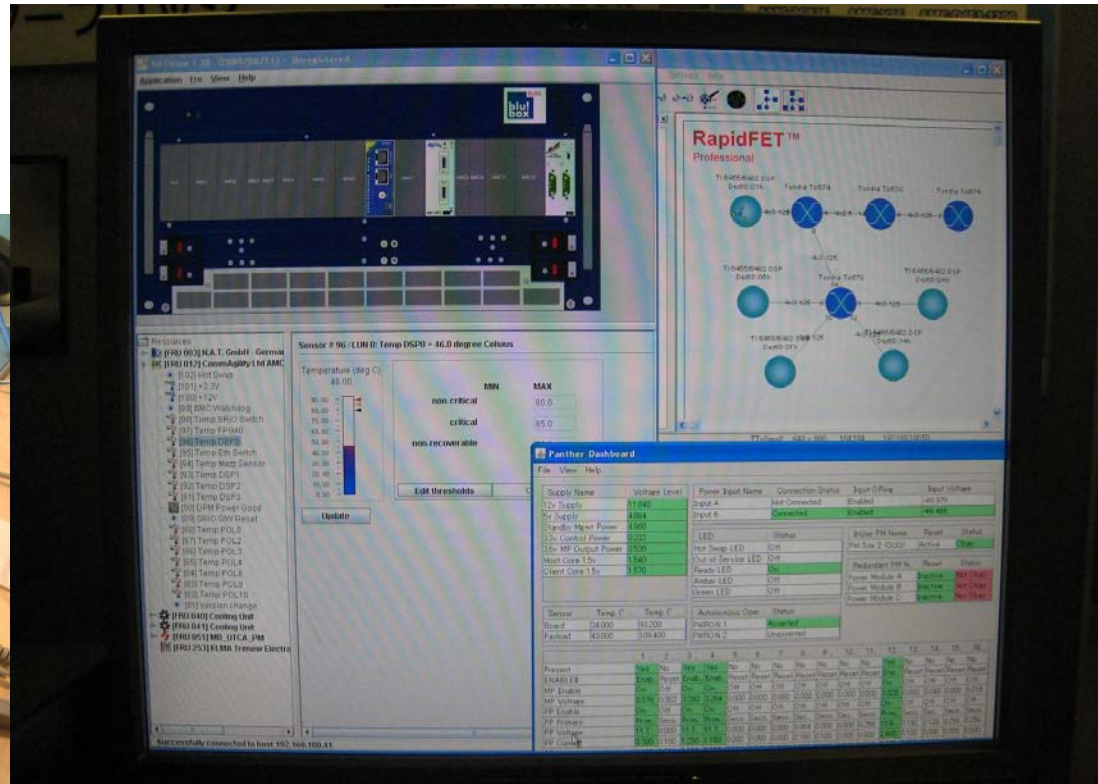

- DSP/FPGA AdvancedMC Modules for Wireless baseband processing
- Fast moving and engineering focused – regular product introductions
- Hardware experts – customers or partners do application software
- Properly engineered and tested OEM product
- No contract design – we own the IPR

Flexible for our Customers

Comm (())
Agility

- Focus on our key OEM customers
- Flexible business model – sell or license
- Ready to adapt/customise products where opportunity and commitment justifies
- Three main application areas to date, all uTCA and WiMax/LTE
 - Test equipment
 - Deployments
 - R&D / trials

Experienced and Successful

- Founders have over 60 years experience in embedded DSP cards
- Fast growth, good Financials
 - Year 3 just completed with over 5x revenue growth
 - 100% owned and controlled by founders
 - Profitable since Year 2
- Technology leaders in Wireless AMCs – by far
 - Highest processing density
 - RapidIO Experts
 - Optical (CPRI) interfaces up to 10Gbps
 - Timing and sync for wireless
- Significant and fast increasing quantity of CommAgility AMCs manufactured

Strategic

Comm (())
Agility

- Key technology and solution partners for Xilinx, TI, Tundra/IDT, AxisNT, Tata etc
- Feedback from our customers worldwide
- Fast paced development
- Last 12 months – added Virtex5, CPRI, GPS
- Focus for next 12 months
 - AMCs for LTE deployment
 - Additional application software partners
 - Talk to us for more details!

What we've Learnt

- Cost is hugely important in deployments
 - Need to be creative to reduce this
 - Total system cost is what matters
- Size and integration matters
 - Boards need to be optimised for the job
 - Chassis/MCH/Power must be right size/cost
 - Often no MCH => AMCs in chassis only
- Flexibility and fast response is key
 - This is a very fast moving market
